

Five Red Balloons

From Feeling The Beat

Five red balloons floating in the sky,
Five red balloons floating way up high,
They passed a tree and one went "POP!"
How many left that did not drop?

(Space to count the remaining balloons)

Four red balloons floating in the sky,
Four red balloons floating way up high,
They passed a tree and one went "POP!"
How many left that did not drop?

(Space to count the remaining balloons)

Three red balloons floating in the sky,
Three red balloons floating way up high,
They passed a tree and one went "POP!"
How many left that did not drop?

(Space to count the remaining balloons)

Two red balloons floating in the sky,
Two red balloons floating way up high,
They passed a tree and one went "POP!"
How many left that did not drop?

(Space to count the remaining balloons)

One red balloon floating in the sky,
One red balloon floating way up high,
It missed the tree 'cause it flew so high,
And floated away in a clear blue sky.
